Telephone Information System Networking

Man3000

Telephone Information Systems

*Man3000 is a Powerful,
Easy to use
Telephone Information
System*

Overview

Each user can have an exact copy of the live system including:-

- Individual client lists.
- Live download screens and graphs.
- Optional monitoring on extensions and/or account codes.
- Alerts

Can act as a back-up of the man3000 database.

Company Network Copy.

Data is distributed via the company network (WAN, LAN or WiFi).

Cloud Copy

Data is distributed through the Cloud which is independent of the company's network. An internet connection is required to connect to the live copy.

Synchronisation

- o Automatic synchronisation of data over WAN/LAN, Wi-Fi or via the Cloud.
- o Optional automatic synchronisation of:
 - Extension names
 - Department names
 - Account codes
 - Client list
 - Client categories
 - Unauthorised client calls
- o Read/Write permission activated on selected Man3000 personal copies.
